

MARKETCLUB SPECIAL REPORT

Marketclub has been a great addition to my trading arsenal as it has given me a way to semi-automate my trading routine. It's been nice to sit back and give my brain and emotions a much needed break.

Marketclub has essentially given me an emotionless way to trade.

And we all know that our human emotions, such as fear and greed, are what cause the majority of traders to fail.

My first trade I made using Marketclub's trade triangle technology happened to be a winner. If my memory serves me correctly it was a call option on Apple Computer and I made a little over \$6,000 on that trade.

Needless to say, I was immediately sold on the Marketclub trade triangle technology.

The next few months didn't turn out so well so I went back to the drawing board to figure out what strategy works best with Marketclub. After a few months of testing and tweaking I found a winning strategy.

1. Trade in the same direction of the general market (Dow, Nasdaq, and S&P).
2. Only trade when the stock and the general market both have strong trends either up or down.
3. Then sit back and allow the trade triangles to guide your entry and exit points.

Seems rather simple and common sense, but you'd be surprised how many of us don't use common sense in trading. I'm happy to announce that the first trial of this simple system produced **\$27,770 in trading profits!**

Here were the results (trades were made in 2009-2010):

STOCK	DATE IN	DATE		OPTION	Price IN	Price OUT	Profit/Loss	% Gain/Loss	Days in Trade
		OUT	OUT						
AAPL	4-Sep	25-Sep		Jan 170 Call	15.35	21.98	\$3,315.00	43%	22
	5-Oct	15-Oct		Jan 185 Call	14.83	16.03	\$600.00	8%	11
	20-Oct	27-Oct		Jan 195 Call	13.53	13	(\$265.00)	-4%	8
	25-Feb	5-Mar		Jul 200 Call	18.53	27.18	\$4,325.00	47%	9
PCLN	30-Nov	9-Dec		April 210 Call	25.65	26.95	\$650.00	5%	10

			SUM			\$27,770.00		

Learn-Stock-Options-Trading

.com

I shared these results with my options coaching students and they couldn't wait to sign up and try out the service for themselves.

If you're reading this report you are most likely already a member of Marketclub, but if you haven't signed up feel free to join at the link below:

www.learn-stock-options-trading.com/marketclub

After seeing how accurate the trade triangles are, I gladly recommend the service.

The rest of this report will serve as a quick start guide to narrow down the amount of time you spend confused with the new service.

OVERALL BIG PICTURE

The 1st thing you should do when you join is watch these videos:

http://broadcast.ino.com/videos/help_theater/

It's the main help section. There are roughly 12 short videos each between 1-3 minutes in length. These videos will help give you the overall big picture. On the charting video she will ask you to click on a link to go to the charting tutorials. ****Don't watch these just yet, I'll tell you when to come back to them****

CHART ANALYSIS SCORE

Go here and briefly read about the chart analysis score so you can use the score to find strong trending stocks (**you can skip the video portion because you've already watched it**):

<http://club.ino.com/trading/marketclub-help-section/chart-analysis-score/>

For example: When I'm only trading call options I look for charts with a chart analysis score of +90 to +100.

TRADE TRIANGLES

The trade triangles are red and green triangles placed on the stock chart that will assist you with getting in and out of trades. Go to the following link and read every tutorial on the trade triangles:

<http://club.ino.com/trading/marketclub-help-section/flash-charts/trade-triangles/>

The good thing about the trade triangles is that they are never removed from the stock chart, so you can back test them to see how well they performed in the past. You can also verify my trade entry and exits that I showed you earlier in this report.

SET YOUR TRADE ALERTS

Okay you should now have a general feel for everything that the service has to offer. Here is what I recommend you do next:

1.) Enter your favorite list of stocks into your portfolio. You could use smart scan to find your stocks as an alternative, but the only stocks I trust are my Investor's Business Daily stocks.

2.) Log in and go to the Alerts section and set up your portfolio to alert you to when stocks in your portfolio produce Daily, Weekly, or Monthly trade triangles:

****Warning**** You will be emailed the alerts and sometimes I never receive my alerts via email so it's always good to review your charts periodically to ensure you are getting an accurate picture of how things are performing.

WHAT'S NEXT?

It takes a day or two for the technology to scan through your stocks and e-mail you possible trade entries so now is the time you can spend watching the charting tutorials:

http://broadcast.ino.com/education/better_charts

Learn-Stock-Options-Trading

.com

You might want to also check out their trade school (only available to members):

<http://club.ino.com/members/school/>

Some of the lessons are old, but the material and advice can still be applied today. I was a little disappointed about the out of date material, but I listened to a few lessons and gained a few nuggets of valuable wisdom.

Good luck and if you have any other questions, please let me know.

Regards, Trader Travis

www.learn-stock-options-trading.com/marketclub

P.S. Since I'm an avid user of Marketclub and even teach my Options Coaching students how to use the service Marketclub has been so kind to give me special referral links for all of my readers.

You could use the link above to verify my trade results for yourself. Go ahead they're real I have nothing to hide :)

So go take a look at the service. It's one of the best trading services I have ever been a part of.

****Please Note****

Marketclub pays me a small referral fee when friends sign up through one of my links, but I don't care. It's a great service, I use it, gladly recommend it, and none of my friends have ever complained about me helping them make money ☺.

If you have any issues with people being compensated for adding value to your life, then sign up directly. But keep in mind you will not get any future bonuses I offer as I have no way to track you.
